INTRODUCTION

Despite being world's youngest country in terms of demographic dividend, India has only 2% of the workforce skilled compared with 96% in South Korea, 74% in Germany, 50% in USA & 45% in China. All these years, we focused on building Higher Education and very little did we think of enhancing the Employability Quotient (EQ) and produce skilled manpower through skill trainingInterventions. Today, more than 62% of the population is in the working age group (15-59 years) and more than 54% of the total population below 25 years of age making India one of the youngestcountryintheWorld.

In today's world of Globalization, Skill Training is an Integral component of increasing efficiency& productivity for sound economic development of any economy. In India, it's still at a nascentstage, however the demand for skilled manpower is huge and to cover this gap, our Hon'ble PrimeMinister Shri Narendra Modi encouraged "Skill India Mission" and formed a separate ministrynamed "Ministry of Skill Development & Entrepreneurship (MSDE)" in 2014. The Ministry isdedicated to skill 400 million workforces by 2022. MSDE has launched Pradhan Mantri KaushalVikas Yojana (PMKVY) which is the flagship program outcome-based skill training scheme tomobilize a large no. of Indianyouths to take up skill training & become employable and earnbetter livelihood. National Skill DevelopmentCorporation (NSDC) is a central nodal

agencyunderMSDEresponsibletobuildstrongskilltrainingcapabilitythroughfundingtrainingpartners.

In this context a separate state-wise department was formed. Sikkim Skill Development Mission(SSDM) is the nodal agency of Sikkim State has shared the valuable information while preparing the District Skill Development Planof the Namchi District.

NAMCHIDISTRICT

District Skill Development Plan (DSDP) is prepared by SANKALP Team, SICB, Skill Development Department, Govt. of Sikkim with the support of District Skill Committee and all the Block Development Officers of the Namchi District. The DSDP istargeting rural youth andwomen by providing them required skill sets and opportunities for employment and self-employment in various fields and to be productive members of their familyand society. The final report included compilation of field visit and secondary source data with the consultation of different stake holder, government office and industry etc.

This is to confirm that the plan has been prepared by the district and all the data information hasbeentakenfromcredible sources andreferences in the proposal.

EXECUTIVESUMMARY

Area wise it is the smallest district of Sikkim and population-wise second one. Namchi (meaningSky High) is the headquarter of District which is nestled among the hills having elevation of 5500 ft andwhich commands panoramic view of snowcapped mountains and vast stretches of valley. As per census 2011out of total population, 14.4% people lives in urban areas while 85.6% lives in the rural areas. Economically district is depending primary activities in additional pharmaceutical industries in the district are mainly in dicators of growth.

Eco-tourism and others start- up hubs mushrooming in the district. Organic agriculture is a unique productionmanagement system which promotes and enhances agro-ecosystem health, including biodiversity, biological cycles and soil biological activity and this is accomplished by using on-farm agronomic, biological and mechanicalmethodsinexclusionofallsynthetic offfarminput.

The total literacy rate of Namchi District was 81.42% in 2011 which is less than average literacy rate 81.42% of Sikkim. Population-wise, out of total 106,741literates, males were 59,357 while females were 47,384.Themaleliteracyrate was86.52% and the females' literacyrate was75.82% in Namchi District.

Furthermore, industrial training center, vocational courses had been adopted in the school, and colleges. Different types of training under the schemes of State and Central Government has been carried out in the District.

MIGRATIONPATTERN

Migration is dynamic of population change, it provides important information factors whichindicatorsthecauseofsocialandeconomicchanges. Theincreasing influxintosouth Sikkimisa genuine issue in the district. In Sikkim as a whole migration were categorized on the basisthose who don't posses certificate of identification (COI) or land registration document or *Parcha*. In the District, large scale of migration in pharmaceutical companies has been found. But I could not able to come out with exact percentage. As per the previous report Temi teaworkers has been migrated from Nepal and rest of India. The impacts of migration have been economic, social and cultural. In economic impact have losses of unskilled and semi-skilledjobs for local unemployed in the south district. A change in demographic profile consequently increases in garbage, pollution, disease violence, rape and theft etc. In cultural impacts such ascultural assimilation and identity threathas been observed in the district. As perthein formation 17.72% migration populations recorded in the district.

JOBSEEKERSINSOUTHDISTRICT

Estimated number of job seekers has been categorized under 15-59 years and all other ages and projected for the 5-year period from 2021 to 2026.

Total job seekers in the age group 15-59 years are predicted to increase from 19700 in 2021 to 23397in2026. Jobseekers in this agegroupare lowerthanall otherages combined. The numbers of femalejobseekers in this agegroupare higher than malejobseekers

Totaljobseekersintheage60&aboveyearsarepredictedtoincreasefrom21022in2021to24904 in2026.

Thenumber offemales jobseekers in this age group is higher than male jobseekers.

Kevgapsofdemandandsupply inprimarysector

Givenitsagro-

climaticconditions, district has vast potential for growing different types of fruits, vegetables, spices and exotic flowers. Currently, most of the horticulture potential remains untapped. However, the district has started taking efforts to exploit its floriculture potential. This is especially true for exotic orchids. The State as whole produces more than 450 species of orchids, which are sold across India.

- > Inagriculturetraditionalmethodoffarming.
- LimitedknowledgeofHYVs.
- ➤ Themethodologyusedforgrowingflowersisalsoveryold.
- Thereislimitedunderstandingofnewtechnology.
 Thereisalsolackofknowledge aboutpreparingplanting.

- ➤ District has high scope of tourism sectors such as village eco tourism, home stayonly limited individuals are working on such activities. Due to lack awareness andmore prioritygiventoGovt.jobsinsteadofselfemployed.
- ➤ Incubator center completely nil in the district only demonstration has been given by KVK, Namthang.

Key gaps of demand and supply in secondary sector: South Sikkim hasmore than 13 pharmaceutical companies such as Micro lab ltd., Cipla, Zydus Cadila, Unichem, Alembic, IPCA, Golden Cross, and Intas etc.

Gaps:

- Lessnumberofskilledmanpowerinthedistrict.
- ➤ Limited/absencepharmacyinstitutioninthedistrict
- ➤ Lackoftechnicalknowledge

ACTIONPLAN

Working as a Mahatma Gandhi National Fellow in the district of South Sikkim has been a trulyenrichingexperience. Reached to the grasshood level and being with people and also understanding district administrative inclosely.

As per my district immersion finding, the tourism is the second major contributing industry of South Sikkim. Its growth and development has changed the tourism profile of the state and Namchi is the newly added successful place of attraction to the tourists. The gradual increase of inflow of both domestic and overse astourists in Namchiwhich is located in the Eastern Himalayas is slowly becoming a promising place of tourism and it is anticipated that soon it will be an important land mark in the tourist map of south Sikkim, because of its overall infrastructural facilities supporting tourism industry.
